

RECOMMENDED USE FOR CLEANING PRODUCTS

Dilution Table using **Super 10** as All Purpose Cleaner

Using Buckets	Super 10	Water	Ratio
Normal floor and wall washing	30ml	9 litres	300:1
Heavy duty floor and wall washing	45ml	9	200:1
Windows	10ml	4.5	450:1
Pot and pan washing	45ml	4.5	100:1
Wax stripping	450ml	4.5	10:1
Heating and air conditioning filters	45ml	4.5	100:1
Grill and range filters	360ml	4.5	12:1
Motor parts and greasy tools	150ml	4	26:1

Using 500ml dispenser	Super 10	Water	Ratio
Oven and grill cleaning	100ml	300ml	3:1
Windows, mirrors, ceramic tiles, stainless steel	1ml	450ml	385:1
Wash basins, dirt & grease spots, carpets, upholstery, garbage cleaning, chrome & brass	15ml	450	30:1
Toilet bowl cleaning	45ml	450ml	10:1
Degreasing kitchens, engines	100ml	300ml	3:1

Fatsolve

Mix contents and pour into a container at a mixture of 1 : 10 or more, depending the cleaning purpose for which it is required.

- ⇒ Works on hard and fatty surfaces.
- ⇒ Excellent for dissolving fat like on restaurant kitchen floors, "fat traps" and the grill area.
- ⇒ Has high foaming abilities

Trouble spots

1. **Ceramic Tile-grouting:** 1 part **LC30**, 1 part **Super 10** to 10 parts water. Scrub with brush.
2. **Wax stripping:** **Fatsolve** mixed at 1: 3 ratio in **HOT** water. Apply with string mop. Soak for 5-10 minutes. If old wax is stubborn add more concentrate to cleaning solution.
3. **Floor Waxing:** Prepare floor for **Fantastik** to bond properly by stripping old wax as described above and rinse with 1 cup of vinegar mixed in a bucket of water. When dry, apply Fantastik in the following way. Apply with either wet string mop, damp cloth or sponge. Wring applicator as dry as possible. Apply Fantastik evenly and as thinly as possible. It will dry faster. Allow each coat to dry thoroughly. Apply 3 coats or until the desired gloss has been acquired. Porous

surfaces may need more layers. To touch up heavy traffic areas, use diluted Fantastik, 1 part Fantastik and 3 parts water in a spray bottle. Clean area first of grime and dirt. Avoid Super 10 or fatsolve for cleaning, as it will remove the Fantastik.

4. **Cleaning waxed floors:** 5ml **Wash & Wax** in 9 litre water. Mop floors. If floors already have a high gloss, e.g. marble floors, Wash & Wax ought to be sufficient.
5. **Cleaning non-waxed floors:** Terrazzo, tiles, brick floors, slasto etc. Mix **LC 30** in dilution of 1:100 (10ml in 10 litres of water). Use mop or brush. Rinse foam with clean water. Dilute more if there is too much foam.
6. **Carpets:** Spots with **Super 10** mixed 1:10. Shampoo with **Carpet Glo** mixed 1:15. If carpet is greasy, mix a $\frac{1}{4}$ part Super 10 for each part Carpet Glo.
7. **Ovens:** Fill spray bottle with **Super 10** or **Fatsolve** mixed 1:3. Heat oven to 93 degrees Celsius. Turn off. Spray oven with mixture and keep moist for 10 min. Use "goldilocks" pad and scraper to remove baked-on crust. Repeat if needed. For very dirty ovens use **Fatsolve** concentrated.
8. **Windows:** Mix **Carpet Glo** 1:100. Spray and wipe clean with lint free cloth. Big outdoor windows, which can be washed down with clean water, use **Wash & Wax** 5ml in 9 litres water. Use applicator or cloth. Wash or hose windows and let dry by itself. Ought to dry without leaving watermarks.
9. **Restaurant grills and hoods:** Spray **Super 10** mixed 1:3. Agitate carbonized matter with "goldilocks" pad. Rinse with water or **Wash & Wax** 1:100 solution for protective layer of silicone.
10. **Toilet Bowl cleaning:** Pour 10 ml of **Fatsolve** in bowl. Soak 10 min. and scrub until clean.
11. **General Disinfectant:** Toilets, sink, garbage cans etc. Mix **Care** 1:3 and apply. Care does not mask offensive odours with a strong perfume, but destroys the odour chemically at its source. Do not mix with any cleaning product. It will neutralise Care's abilities.
12. **Concrete cleaner:** **Fatsolve** if surface is very soiled. If not, see "non-waxed floors".
13. **Hand cleaner:** 1 Part **Fatsolve** to 1 part water in applicator.
14. **Toilet odours:** Spray 1 or 2 pumps of **Fresh** directly under toilet seat. Wet-mop solutions: 30ml Fresh in 1 litre of water and wash toilet and urinal surfaces with solution. **Fresh** solution can be mixed into other detergent combinations for a fresh odour in area that is cleaned.
